The Journey Continues...

Eagle Project

My Eagle project was to design and assemble a prototype for a prone weeding and harvesting cart for the Holy Cross Pentecostal Church Food Bank Farm. With a small fleet of carts, planting and harvesting can be more efficient and ergonomic which will increase the impact of volunteer hours. Because of COVID restrictions, I was limited to executing the project with my family in the driveway of our home. Between planning, designing, acquiring material and assembly, the project took almost 100 hours of volunteer time to complete. I have to thank Mr. Calder and the beneficiary Mr. Eichner for spending so many hours helping on the design of the cart.

The challenging part of this project was adapting the design to work with the material provided by the beneficiary and to move between multiple assembly teams and still provide effective leadership. The rewarding part was seeing the project come together efficiently and seeing the participants improve and work effectively together. I learned that it is difficult to be fully prepared for the unanticipated hardships on the actual day of the project.
